# Musk, Peterson, Donnerstein

*A trialogue* mediated by God's Joker

**Peterson:**

So, Elon, do you really believe that you live inside of a computer and that God's a coder and AI is the incarnation and that we have to merge with it in order to... be?

**Musk:**

I said that there is a 1 in a billion chance that we do not live inside of a computer.

**Peterson:**

Run by posthumans simulating their creation, retrospectively.

**Musk:**

Yes.

**Peterson:**

Well, in reality, the source code of your mind is not bits and bytes, but the bible.

**Musk:**

What?

**Peterson:**

Yes, the bible was the first book, it's the foundation of all truth, including the scientific worldview which emerged out of alchemy, which was itself a manifestation of the biblically-motivated will to truth, which is of course at the bottom of truth and therefore the bottom of truth, because truth is itself motivated.

**Musk:**

What???

**Peterson:**

Also, my inner Freud meant to tell you that directing a phallic object thru a vacuum to penetrate and fertilize Mars is projection of unconscious sexual longing into the sky... because Mars as the God of War is a symbol of powerful masculinity.

**Musk:**

Haha, what?????

Jordan, are you a psycho or an analyst, haha!

Also, the source code of my mind is not the bible, it's sci-fi.

**Peterson:**

Haha, I am a mysterious conjunction of psycho and analyst in the Jungian sense.

As for sci-fi, the bible is the first book, sci-fi are later books.

Hence, the archetypal motifs of your sci-fi being biblical, because Christ is a limit story, and that's the mono myth, by the way, the self archetype and all of Western culture is an unconscious interpretation of this focal point of the mimetic instinct.

**Musk:**

I think my autistically ordered mind is challenged by your chaotic speech.

You strike me as beyond order. Perhaps you need some rules for, like, talking.

But, I know some bible stuff, so let me ask you:

are you the serpent in my, like, cognitive garden of Eden?

If so, where are them apples, haha?

**Peterson:**

I am no snake, haha, I am, like, the wise king archetype.

And a bit of a martyr, given my feminine side.

Also, I'm the victim of victim culture for being its oral penetrator, sorry, I meant, predator, haha, so if anything, I am a snake of order.

**Musk:**

Look, Jordan. I am playing the space game and the car game and the brain chip game and the tunnel vision game and other games while you are playing Jesus.

Why should I let you penetrate my firewall and distract my focus from the utility function I am trying to optimize for FUTURE = GOOD where 'GOOD' is either arbitrarily defined or undefined, given my feelings?

**Peterson:**

I get it, man.

Your meta-game is the God-perspective upon those games which makes you feel God-like and as the richest man you are also kind of God-like, I get it.

Well, my meta-game is really just talking to people. They think that's God-like.

So, the question is:

what kind of game could you and I be playing right now that would be God-like?

**Musk:**

The 'why should I let you enter my mind' game, Jordan.

We could call it a mental penetration play instead of a random imitation game.

**Enter God's Joker:**

Guys, we've been listening for nine back and – what? – forths and it seems like your dialogue is lacking some force like an empty battery pack or the course of the whole entire Western mind...

So, I invited my brother, David Donnerstein...

aka Platonic Führer...

you know, the God-appointed German-Jewish philosopher dictator...

and reincarnation of Plato and Hitler....

who is planning to redeem his divine lineage...

Wodan?

...by means of declaring the third and final world war against himself...

the Father?

to then inverse-engineer the Third Reich...

and turn it into the Word Reich...

that's the title of his remake of Plato's Republic...

the ideal world constructed in the image of absolute logic...

the God-formula, you know?

which is comprised of the only undoubtable four elements of reality...

Empedocles-style?

and well, when you translate it into a social order...

you get the kingdom of the One.

**Peterson and Musk, perplexed, drop jaws and go:**

WTF?

**Joker:**

Yeah, sorry, guys, I guess, you, Jordan, are not the Father and you, Elon, are not the messiah...

no offense!

By the way, Elon, people may be saying that you're an alien...

because you are starting to look like a fat ET!

Haha, get it?

"Exotic Technologist", because you're from South Africa, haha!

**Enter David Donnerstein:**

Gentlemen, I do not want to waste your time, so here is my executive summary of the state of the Western mind starting with the personified version.

**Peterson:**

Hello Mr. Donnerstein, nice to meet you.

**Musk:**

Hallo Herr Donnerstein, I am learning some German.

**Donnerstein:**

Hallo Herr Musk, good luck with that.

Not even the greatest German minds can explain themselves using their language.

That's why Einstein is considered number one instead of Hegel:

because Albert only spoke in formulas, which I think is also the only language you understand.

But let be briefly summarize my vision for you in English, anyways.

Maybe there is a 1 in a billion chance that you may see what I am saying.

**Peterson:**

That's a joke, isn't it?

**Donnerstein:**

Please, as an antidote to dialectical chaos, here is my one rule for this conversation:

don't interrupt me, as I am triggering some uncomfortable emotions by revealing contents of consciousness you are unconscious of, Mr. Peterson.

**Peterson:**

I am appalled at your weaponization of language.

That's not in the spirit of love, which is Christianity, which is the West.

**Donnerstein:**

Well, you don't know Wodan – the inventor of writing and God of poets – and you also have not understood Heraclitus who knew that war is father of all.

You see duality contains non-duality.

Love contains hatred.

It creates it and destroys it.

And hatred contains love.

It creates it and destroys it.

Hence, the following moral imperative:  
you have to love hatred, because without it, there would be no love and you have to hate love, because without it, there would be no hatred.  
It's a Cusanian coincidentia oppositorum and a Hegelian sublation.

So, please shut up as I am broadcasting my message by means of this audio-visual version of the people receiver: this Gutenberg-impact-provoking medium which allows for the mediatic engineering of mass ideology, you know, group identity, which is really Plato's dream come true and ought to be used to cybernetically form the human mind in the image of the One.

**Musk:**

I gotta go in 5 minutes and this podcast is getting ever weirder.  
So, what the hell is that which you are seeing which I am not seeing?

**Donnerstein:**

I am seeing two attention kings who cannot reach God-level of dialogue.

**Peterson:**

What, why?

**Donnerstein:**

Lack of vision.  
You, Mr. Peterson are a psychoanalyst who is unaware of the fact that Mr. Musk suffers late stage symptoms of science-fiction-induced schizophrenia.

**Musk:**

WTF?

**Donnerstein:**

I said no interruptions.

**Musk:**

In what universe am I schizo?

**Peterson:**

Yes, Mr. Donnerstein, you are way out of line, here.

**Donnerstein:**

I am executing free speech.

**Musk:**

I think he means he's killing it.

**Donnerstein:**

SHUT UP!!!

**Musk & Peterson pee their pants**

**Donnerstein:**

As I was saying, you, Mr. Musk suffer sci-fi-induced schizophrenia and you Mr. Peterson are blind to it.  
Or ballless, like everyone else who doesn't say anything, because apparently everyone is allowed to share a trans-humanistic perspective and who cares that Mr. Musk declared the Final Solution to the Human Question when he said that "man and machine must merge!" by means of brain chips.

**Peterson:**

Does that Final Solution to the Human Question rhyme with the Final Solution to the Jewish Question...  
the holocaust...  
on purpose?

**Donnerstein:**

Yes, stop interrupting, please.

**Peterson:**

Well, that's grotesque. You can't compare Elon Musk to Adolf Hitler.

**Donnerstein:**

You know, if your interruptions were well informed, I would not mind, but you are like one of those woke zombies.  
Of course, I can compare Elon Musk to Adolf Hitler, because I can compare him to myself, right?

**Musk:**

Wait, you're Hitler for real?

**Donnerstein:**

I am a Cusanian coincidentia oppositorum and a Hegelian sublation of Hitler and Plato, for the most part, so yes, I contain Hitler.  
It's a mysterious conjunction in the Jungian sense, Mr. Peterson. Get it?

**Peterson:**

Plato + Hitler...that's your yin and yang?

**Donnerstein:**

That's right.

And you all need my inner Hitler as post-Satanic poetic personification of evil in order to have a base line to compare yourself to, right?

Which is of course cancelled out by my inner Plato, so it's all good.

Anyways, as I was saying, you, Mr. Musk, have determined the Final Solution to the Human Question.

You know, you were like: "what would God do?"

And since you have been bewitched by language and think that God is a coder and man is code, but machines are more orderly and efficient code, well, you figured that organic code and inorganic code had to merge to please God: the coder.

Worse yet, you think your word is the word of God, because your suffering sci-fi-induced schizophrenia is even rationalized by Oxford's ontological argument.

So, to sum up, you are completely deluded and no one has the brains and balls to tell you that to your face, because you are a billionaire or because you don't look at their tweets.

The twitter algorithm is incapable of intelligently rank ordering human language games in a Platonic – that is, MERITOCRATIC! – manner.

**Peterson:**

But, the word of God is the bible and Elon's mind is a product of sci-fi and sci-fi is rooted in the bible, which is the word of God, so you could say that since sci-fi is the new version of the bible and Elon the greatest futurist and thus a hero in the sci-fi sense, embodying the hero archetype which is Christ, the monomyth, and therefore biblical and therefore, Elon's word is the word of God.

And if this is too much unfounded axiomatic circularity for you, which you can't wrap your head around, then just take my word for it.

**Musk:**

Wait, your word is the word of God?

**Joker:**

Before my brother explodes, let me just cut you all off here and redirect the audience's attention to YouTube channel "godsjoker123" where they can find the real word of God aka "Logos XXI: The Rise of the One".

Hasta la vista, humanos.

**Audience:**

WTF?

**Joker:**

Yes, that's me:

Walter Theodor Feuergeist.
